SIGANTO
CONCRETE &
CONSTRUCTION SERVICES

Built on Strength.
Driven by Precision.

Capability Statement.

About us.

SEQ REGION-WIDE COVERAGE

Principal-led delivery across South East Queensland. Experienced crews, structured site systems and clear communication keep projects on program and to specification. Siganto Concrete and Construction Services Pty Ltd delivers commercial and civil concrete works and detailed earthworks. We bring deep experience across commercial construction, civil infrastructure and resources, without compromising safety.

"Same crew, same standards, same principal across the full life of every project."

SIGANTO CONCRETE

Scope of services.

Commercial construction

- Structural floor and ground slabs
- Suspended slabs and post-tensioned systems
- Carparks, hardstands and loading docks
- Retaining walls and stormwater structures
- Commercial and industrial floor slabs

Civil infrastructure

- Road and highway concrete works
- Footpaths, kerb and channel, and medians
- Bridge abutments, culverts and headwalls
- Drainage structures and infrastructure slabs
- Industrial yards and hardstand pavement

Resources & mining

- Mine-site infrastructure and hardstands
- Processing facility slabs and structures
- High-volume pour management

Specialty concrete

- Burnished, honed and polished concrete
- Coloured and exposed aggregate finishes
- Protective coatings and sealant systems
- Crack injection and remediation

Project capabilities

- Team experience on multi-million dollar projects
- Complex and staged pours
- Concurrent multi-site operations

Our differentiators.

Principal-led delivery

Richard, our managing director, is across every project, so clients deal directly with the decision-maker for faster resolution and full accountability.

Full compliance documentation

Every job delivered with certificates of currency, AS sign-off and material test reports as required.

Program certainty

Advance scheduling and direct plant access, with communication protocols that protect the principal contractor's construction sequence.

Safety-first site systems

Safety management plans, SWMS, ITPs and hold and witness point management, with daily reporting and incident and hazard protocols on every site.

One crew, start to finish

All concrete works completed in-house, same crew, same standards, same principal across the full life of every project.

Transparent pricing

Itemised quotations, clear scope, fixed-price certainty and straightforward variation processes.
